

Catalog of Kennedy Space Center Covers

Compiled By
RAY F. DUBEAU

INTRODUCTION

This catalog of Kennedy Space Center covers is the first of its kind, and that succeeding supplements will be forthcoming. For this reason I will be most grateful for all listings of covers unknown and not noted herein.

It is my endeavor that this catalog be used as a guide for listing covers with the Kennedy Space Center cancel, and of which covers do exist for the various launchings with this postmark.

The prices listed are based upon actual asking prices from dealers and collectors, and there appear to be no price difference between addressed or unaddressed covers, especially the older items.

The Kennedy Space Center applies an official NASA cachet to mail for the manned flights or important launchings, altho covers will appear on the market without the official NASA cachet, and this is due to the many requests sent thru the KSC facility, thus many covers will receive only the postmark.

The KSC does not apply a cachet to covers sent thru this facility for the minor launchings and so there will be covers with cachets designed by individual collectors and dealers.

Some covers will bear a postmark dated as soon as possible after the event commemorated, due to late hour of launch.

Covers with the KSC postmark are quite scarce, and command a higher price, altho covers with any other postal marking from this Florida launch site are of equal validity, the preference as to what is best to collect, I leave up to the individual.

All postmarks on original covers legible, but due to transfer to printing, some postmarks will appear unclear.
